Summary

Highly motivated and passionate **developer** with a solid foundation in programming and Object-Oriented Principles, coupled with strong algorithmic knowledge and analytical problem-solving skills. Proven ability to quickly adapt to new technologies and tools, with a track record of developing robust, maintainable, and scalable technology solutions. Eager to contribute to innovative product development within a collaborative team environment.

Education

University of "Babeş-Bolyai", BS in Computer Science

Oct. 2022 – July 2025

Experience

Trainee, Reiffeisen - Think Thank Lab @UBB Cluj

Nov. 2023 – Apr. 2024

- Gained foundational full-stack development experience, quickly adapting to new technologies including **Angular**, **TypeScript**, **Java**, and **Spring Boot** to build user interfaces and RESTful APIs.
- Applied object-oriented programming principles in the development process, contributing to a maintainable and modular codebase.
- Participated in an **Agile** team environment, contributing to project goals and learning high execution standards.

Skills

Relevant courses: Object-Oriented Programming, Mobile Development, Data Structures and Algorithms, Operating Systems, Graph Algorithms, Computer Architecture, Fundamentals of Programming, Computational Logic, Robotic Process Automation, Blockchain

Languages: JavaScript, TypeScript, Java, Kotlin, C/C++, Python, PHP, HTML5, CSS3

Databases: MySQL, PostgreSQL, SQL Server, RoomDB, MongoDB

Frameworks: React, Angular, Next.js, Express, Sequelize, Spring Boot, JPA, Qt, Flutter

Tools: Azure Web Apps, Azure Database for PostgreSQL, Azure Container Registry, Azure Container Instances, Figma, Git, Docker, Postman, Maven, Gradle, Jira

Projects

Material Minder - B. Sc. Thesis

Thesis Front-end Back-end

- Designed and developed "Material Minder," a voice-enabled mobile application for construction material management, demonstrating strong problem-solving skills in addressing workflow inefficiencies.
- Integrated advanced Speech-to-Text (STT) capabilities, enhancing user accessibility and workflow efficiency through innovative technological adaptation.
- Implemented a robust and scalable backend using Java Spring Boot with a PostgreSQL database, adhering to Object-Oriented Programming (OOP) principles for maintainability.
- Developed the frontend on Android utilizing Jetpack Compose and Kotlin, focusing on user-centric design for a simplified UI and natural speech-based input system.
- Utilized UiPath Studio for web scraping to populate a comprehensive global catalog of construction items, ensuring accurate and up-to-date product information.

BuzzByte

Frontend Backend

- Led the development of BuzzByte, a web application for tech news and forum discussions, demonstrating excellent **communication and teamwork** skills as Team Lead and Scrum Master.

- Ensured efficient project management through **Agile methodologies**, including sprint planning, daily stand-ups, and retrospectives, adhering to high execution standards.
- Designed and implemented the front-end with **React**, crafting an intuitive UI and seamless UX, while assisting teammates with back-end tasks, showcasing adaptability and collaborative spirit.
- Integrated NewsAPI to fetch the latest news, providing users with up-to-date content and demonstrating an ability to integrate external services into a **scalable solution**
- Enabled users to create, read, and engage in tech discussions through forum features, focusing on maintainable and robust functionality.

Seintracker

Frontend Backend

- Developed a **robust and user-friendly** full-stack CRUD application, showcasing strong analytical and problem-solving skills in delivering a comprehensive solution.
- Leveraged Angular alongside TypeScript for static typing and improved code maintainability on the front-end, applying **OOP principles** for structured development.
- Employed Node.js with Express.js for the back-end, creating a scalable and **efficient server-side infrastructure** that handles data processing and API interactions.
- Deployed the application using Azure Services and Docker, demonstrating proficiency in modern deployment practices and ensuring **scalability and ease of deployment**.
