## Summary

Enthusiastic and committed **Java developer** with experience in backend development using **Java 8+**, **Spring Boot**, and **RESTful APIs**. Passionate about clean, maintainable code following **SOLID** and **KISS** principles. Skilled in developing scalable systems, writing unit tests with **JUnit**, using **Docker** for containerization, and deploying applications via **CI/CD pipelines**. Strong foundation in Object-Oriented Programming, design patterns, and Agile methodologies. Eager to grow within an international team and contribute to high-quality enterprise solutions.

## Education

University of "Babeş-Bolyai", Master's in Software Engineering Oct. 2025 – Present

University of "Babeş-Bolyai", BS in Computer Science Oct. 2022 – July 2025

## Experience

Freelance Frontend Developer, Confidential Healthcare Client June 2025 – Present

- Developing a comprehensive dashboard for therapists to manage patient data and schedules, using **Pure JavaScript (ES6+)**, **HTML5**, and **CSS3** without external frameworks.
- Architected a custom, lightweight state management system using **native Browser APIs** (Proxies and Custom Events) to handle complex data flows and ensure strict data privacy.
- Implemented high-performance DOM manipulation strategies to ensure smooth rendering of large patient lists, achieving 60fps performance.
- Designed a fully responsive and accessible UI using **CSS Grid** and **Flexbox**, ensuring compatibility across all modern browsers and devices.

Trainee, Reiffeisen - Think Thank Lab @UBB Cluj Nov. 2023 – Apr. 2024

- Built maintainable backend services using **Java 17** and **Spring Boot**, adhering to **SOLID** and **KISS** principles.
- Developed responsive frontend components (dynamic tables, validation) using **Angular**, **TypeScript**, and **RxJS**.
- Integrated backend RESTful APIs with the frontend for seamless client-server data flow.
- Collaborated on API contract definitions to resolve integration issues and improve developer handoff.
- Implemented unit tests for backend logic using **JUnit** and assisted with **Karma/Jasmine** frontend strategies.
- Ensured code quality via **code reviews** and **SonarLint** analysis.
- Participated in Agile workflows including daily stand-ups, sprint planning, and retrospectives.
- Managed version control and branching strategies using **Git** and **GitLab**.

## Skills

**Languages:** Java, Kotlin, TypeScript, JavaScript (ES6+), C/C++, Python, SQL

**Backend Frameworks:** Spring Boot, Spring Security, JPA/Hibernate, Express.js

**Testing:** JUnit, Mockito, JMockit (learning), Postman

**DevOps Tools:** Git, GitLab, Maven, Gradle, Docker, Azure Container Registry, Jenkins (learning), CI/CD

**Code Quality:** SonarLint, PMD (learning), Checkstyle (familiar)

**Databases:** PostgreSQL, MySQL, SQL Server, RoomDB

**Web:** Angular, React, Next.js, HTML5, CSS3, DOM Manipulation

**Cloud & Platforms:** Azure Web Apps, Azure PostgreSQL, Docker Hub

**Soft Skills:** Strong communication, teamwork, attention to detail, fast learner, English (advanced)

## Projects

---

### Material Minder - B. Sc. Thesis

Thesis Front-end Back-end

- Developed a **voice-enabled mobile app** for construction material management using **Jetpack Compose** and **Kotlin**.
- Integrated **Speech-to-Text (STT)** to enhance user accessibility and workflow efficiency.
- Implemented a scalable backend using **Java**, **Spring Boot**, and **PostgreSQL**.
- Automated data collection using **UiPath Studio** to populate a global product catalog.

### BuzzByte

Frontend Backend

- Led development as **Team Lead** and **Scrum Master**, managing sprints and daily stand-ups.
- Built the **React** frontend for an intuitive UX and assisted with backend tasks.
- Integrated **NewsAPI** to serve real-time content and enabled forum discussions for user engagement.

### Seintracker

Frontend Backend

- Developed a full-stack CRUD application for task tracking using **Angular** (TypeScript) and **Node.js/Express**.
- Deployed the application via **Azure Services** and **Docker** for scalability and ease of access.

### Construction Materials Web Scraper

Project

- Developed an **RPA** system (UiPath Studio) to scrape and compare material prices from major retailers.
- Managed data integration in **SQL Server** with modular workflows and error handling.
